Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 23 recites the limitation "said hot coals". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-19 and 21-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Steger [Pat. No. 949,453].

Steger teaches a cooking pot comprising a liner (Figure 1, 2), a wire handle which slidably collapses alongside the liner and which is inserted into eyelets (Figure 1, 7-8), a frame with linear portions (Figure 1, 6), a ring structure (Figure 1, 4), the liner and frame being soldered together (line 44), and the frame being inserted between the liner and the ring (Figure 1). Although not specifically termed a "dutch oven", the pot of Steger would inherently provide this function.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Steger as applied above, in view of Racz [Pat. No. 3,934,748].

Steger teaches the above mentioned components. Steger does not teach the use of aluminum. Racz teaches a pot with an aluminum insert (column 7, line 35). It would have been obvious to one of ordinary skill in the art to incorporate the aluminum of Racz into the invention of Steger since both are directed to pot inserts, since Steger already used wire mesh for the insert (line 36), since aluminum was a common material for wire mesh, and since inserts were commonly made from aluminum as shown by Racz.

4. Claims 23-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steger in view of Clement [Pat. No. 5,314,220].

Steger teaches a cooking device and method comprising a pot (Figure 1, 1), a liner (Figure 1, 2), and a handle (Figure 1, 8). Steger does not teach a lid and placing the device on hot coals. Clement teaches a dutch oven comprising a lid (Figure 1, 18) and placing the dutch oven over hot coals (column 1, lines 14-19). It would have been obvious to one of ordinary skill in the art to incorporate the lid and coals of Clement into

the invention of Steger since both are directed to cooking pots and since pots were commonly used in with lids and cooked over coals as shown by Clement.

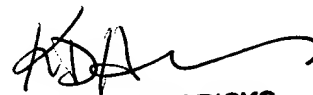

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gantos et al [Pat. No. 6,055,901], Jones [6,313,446], George et al [Pat. No. 3,724,711], Feld [Pat. No. 4,401,017], and Hayes [Pat. No. 751,640], teach pots with liners.
